Flutter developer who ships and maintains production apps people use every day. At Onesttech I built three apps solo from design to store release and contribute to two team products; four of them are live on Google Play and the App Store. I own apps end to end: architecture, offline-first storage, background audio and alarms, AI and on-device ML features, English/Bangla localization, testing and release.

EXPERIENCE

Flutter Developer · Onesttech Software Solutions Apr 2026 – Present · Dhaka

BUILT SOLO — DESIGN TO STORE RELEASE

Budget Mint · personal & shared finance

Live · Play & App Store

734 commits · Flutter, Provider, Firebase, Supabase, Syncfusion charts

- Expenses, trip splitting with invites, mess-meal budgets, savings goals and recurring bills.
- PDF & Excel reports with correct Bangla rendering; Google & Apple sign-in, biometric lock, home widgets, Crashlytics.

FuelSync · offline-first fuel log

Live · Google Play

392 commits · Flutter, Riverpod, Drift, flutter_map, ML Kit

- Real mileage and cost per km from each full tank, stored offline in Drift; spend charts and PDF vehicle reports.
- Receipt OCR with ML Kit, GPS trip maps, service reminders and an app lock.

Dosey · medicine reminders & family care

In development

169 commits · Flutter, Riverpod, Drift, Supabase, Firebase

- Full-screen alarms that ring even when the app is closed; family sharing on Supabase with row-level security.
- BP & sugar logs, doctors and records, medicine stock and expense tracking, push notifications.

TEAM PRODUCTS — MY CONTRIBUTION

RUSHD · Islamic lifestyle app

Live · Play & App Store

127 commits · Flutter, EN/BN

- Built the shared design system (spacing, radii, buttons, cards) and redesigned the prayer-times screen with a live status card, Qibla card and Hijri/Bangla calendar.
- Built downloadable Quran audio packs, surah-name calligraphy and a What's New page; prepared Play Store releases.

Quran Audio · Quran streaming, 260+ reciters

Live · Play & App Store

119 commits · Flutter, just_audio, Firebase

- Wrote a streaming source that skips oversized ID3 cover art, so stories start playing on slow links instead of buffering for a minute.
- Built reciter pages, stories, the queue and mini player, share cards with deep links, and set up Firebase.

PROJECTS

Docyra · offline document & ID scanner

Personal · in development

342 commits · Flutter, Riverpod, OpenCV, ML Kit, Syncfusion PDF

- Live edge detection, on-device OCR and passport MRZ parsing; merge, sign and lock PDFs without uploading anything.

AyurVision · AI medicinal-herb identifier

BSc thesis

253 commits · Flutter, Provider, Hive, Dio · Python, FastAPI, TensorFlow

- Leaf photo → TensorFlow classifier behind a FastAPI **/predict** service; confidence score and an offline 24-herb library.

Ekushey Coding · Bangla-English code-learning platform

University team · live

Next.js, TypeScript, Tailwind CSS, Laravel · ekusheycoding.vercel.app

- Five-person team; I built the languages pages, bilingual exercises, the admin tutorial editor and theming.

SKILLS

Mobile

Flutter Dart Riverpod Provider

Responsive & tablet UI just_audio

Alarms & notifications Home widgets

Data & backend

Firebase Firestore FCM

Supabase RLS & Realtime

Edge Functions Drift / SQLite Hive

REST · Dio

AI & ML

Google ML Kit OCR OpenCV

TensorFlow FastAPI

AI assistant integration

Shipping

Clean architecture

Unit, widget & integration tests
