SUMMARY

Flutter developer who ships and maintains production apps used every day. Four apps live on Google Play and the App Store — two as part of a product team and two I built solo, from design to release. Comfortable owning an app end to end: architecture, offline-first storage, background audio and alarms, English/Bangla localization, testing and store release.

SKILLS

Mobile	Flutter, Dart, Riverpod, Provider, responsive phone & tablet UI, background audio (just_audio), alarms & notifications, home-screen widgets
Data & backend	Firebase (Auth, Firestore, FCM, Crashlytics, Analytics), Supabase (RLS, Realtime, Edge Functions), Drift / SQLite, Hive, REST APIs with Dio
On-device ML	Google ML Kit (OCR, document scanning), TensorFlow Lite, OpenCV edge detection, passport MRZ parsing
Engineering	Clean architecture, unit / widget / integration tests, Git, CI builds, Play Console & App Store Connect releases, i18n (EN / BN)

EXPERIENCE

Flutter Developer — Onesttech Software Solutions

Apr 2026 – Present · Dhaka

- Delivered **436 commits over 78 working days** across team products and three apps I built solo for the company.

Team projects — my contribution

- RUSHD** (232 commits, live on both stores): built the Ask Noor AI assistant with conversation history and voice playback, a live two-player vocabulary game, recitation checking, the Hadith library and tablet layouts; shipped through v3.6.0.
- AI Quran Majeed** (121 commits): part of the team that took it from first commit to store growth in **six weeks** — background playback, sleep timer, stream caching and a fallback source for weak networks.
- ESDANA** alumni-network app (49 commits, built in three weeks) and **Website Monitor** uptime/SSL/domain checks (34 commits).

Built solo for Onesttech — design to store release

- Budget Mint** (live, Android & iOS): expenses, trip splitting and shared mess-meal budgets; PDF & Excel reports with correct Bangla rendering; Firebase sync, Google & Apple sign-in, biometric lock.
- FuelSync** (live, Android): offline-first fuel log with automatic mileage and cost-per-km, receipt OCR with ML Kit, trip maps and service reminders.
- Dosey** (in development): medicine reminders with full-screen alarms that ring even when the app is closed; family sharing on Supabase with row-level security and Realtime.

PERSONAL PROJECTS

Docyra

Flutter · OpenCV · ML Kit · PDF

IN DEVELOPMENT

- Offline document & ID scanner — nothing is uploaded.
- Live edge detection, OCR, passport MRZ parsing; merge, sign, watermark and lock PDFs.

AyurVision

Flutter · ML model API · Dio

BSC THESIS

- Identifies medicinal herbs from a leaf photo with a confidence score.
- Image-classification model behind a /predict API; offline 24-herb library.

EDUCATION

BSc in Computer Science & Engineering — Daffodil International University

2022 – 2026

Thesis: AyurVision, an AI medicinal-herb identifier (Flutter app + image-classification model).

LANGUAGES

Bangla (native) · English (professional working proficiency)
